

CAMS Automatic Rhinestone Setting Machine

The new CAMS IV-6P-B Automatic Rhinestone Setting Machine can set up to 170 stones per minute, can quickly and easily change size/color and has a working area of 15.75 x 15.75 inches, making it perfect for large and intricate designs. And with the simple touch of a button, the same design can be created multiple times.

The optional model IV-6P-O features a rotating platen, allowing you to set stones at any angle and giving you even more creative freedom with the design. Optional models have a working area of 11.8 x 11.8 inches, and can set stones at up to 140 stones per minute.

Features

- ✓ Simplified buttons for easy operation
- ✓ User-friendly LCD graphic menu
