

# Hoop Master

by Midwest Products, Inc.

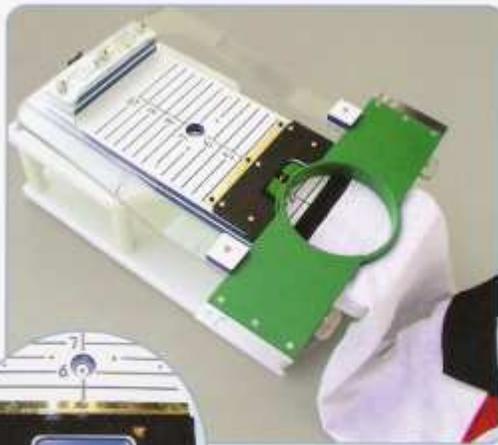

*Guaranteed to Improve Accuracy and Productivity*

# HoopMaster is a Revolutionary Tubular Hooping System

Midwest Products has created a hooping system which is simple in design and built to withstand the punishment of a commercial environment. Even the most inexperienced employee will find it easy to use. HoopMaster will have new employees hooping quickly and accurately

in no time at all. Your productivity and profitability will increase as well as the quality control your customers deserve. Put this innovative system to work for you. The many time saving and profit building features will quickly pay for themselves.

## Freestyle

*Freestyle*

**The Freestyle Arm is perfect for:**

- Sleeves
- Cuffs
- Collars
- Jackets
- Cap backs
- Pant legs
- Aprons
- Towels
- Bags
- Ties
- Youth garments, etc.

### **Horizontal and Vertical Lines on the Freestyle Arm**

The lines position your logos consistently without manually measuring and marking each item.

The Freestyle Arm is used on a portable base and is custom made for your hoops. This provides you with the most accurate and smallest hooping surface possible, making hooping in tight spots a breeze.

30-DAY money back guarantee

The HoopMaster Fixture is designed to be used on the Station, the Freestyle Arm, or even flat on your table for blankets and towels.

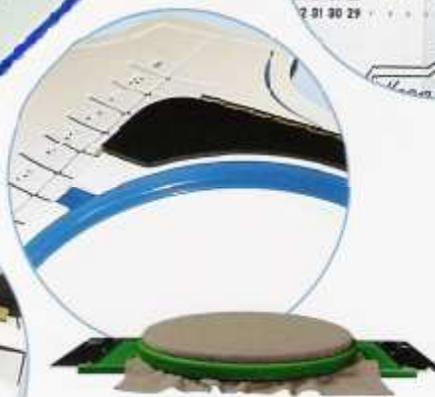

# The Station

There is no hardware to adjust or lose when changing the logo location. Simply lift up the fixture and set it down in a new location using the self-aligning pin locators.

## Number and letter grid

The grid is used to document logo placement for repeat orders. For example, when you document that a logo is placed at "D19" all repeat orders will be consistent and easy to set up.

## Rim on Fixture

The raised rim recesses the hoop ring at the correct depth every time. This holds the garment taut while being embroidered.

## Magnetic Backing Material Holder

Eliminates the need to use tape, clips, or messy spray adhesive. The magnetic flaps hold the backing material in place over the lower ring while you hoop the garment.

## The Fixture Arms

The arms hold the tubular hoop perfectly square with the work surface and directly over the lower ring. All you have to do is align the shirt and press the hoop down.

## The Station is perfect for:

- Sport shirts
- Sweaters
- Sweatshirts
- T-Shirts
- Jacket fronts and backs, etc.

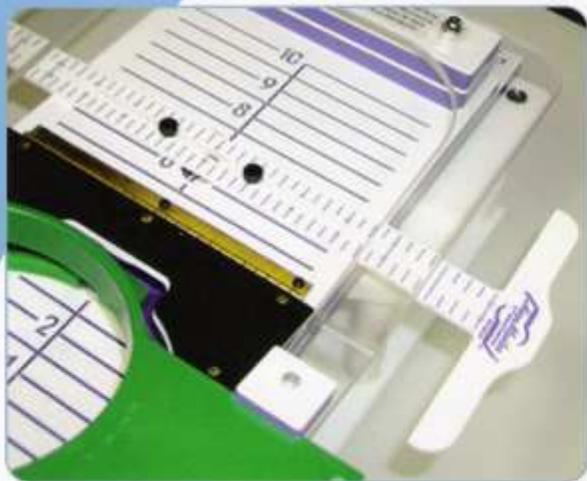

Fixture shown on the Station with shirt.

# HoopMaster Accessories

## Pocket Alignment Guide

The Pocket Alignment Guide is designed to provide a precise alignment grid for pockets and striped shirts. It can also align lettering to existing logos. The Pocket Alignment Guide never needs to be adjusted like a laser, and is 1/10 the cost. It is completely portable and makes hooping shirts with pockets and stripes simple. The Pocket Guide is versatile and can be used with the HoopMaster, or your existing hooping device.

## T-Square

The T-square eliminates the need to pre-measure and mark garments. This makes logo placement on jackets and other garments easy and consistent.

## Jacket Back Frame

## System Benefits

1. Less chance for operator error.
2. Reduces ruined and damaged garments.
3. Easy enough for even your most inexperienced employees to use.
4. Helps you obtain higher quality and more consistent embroidery.
5. Does not require any power or air like pneumatic hoopers, and is a fraction of the cost.
6. Allows you to hoop faster and more accurately to keep the embroidery machines running.
